

# Sample HTML

## Document declaration

An indication to the browser to enable correct rendering of the code. This is the HTML5 declaration

## HTML

The container for the whole document

## Head

Contains supportive information and elements that affect display of elements in the body, for instance CSS etc.

## Title

Referenced in bookmarks/favourites and browsing history. An important element for SEO.

## Body

Visual part of the document.

## Heading

Indicates this text is significant to page content.

## Paragraph

A block element for containing text or other elements

## Link

## Image

```
<!doctype html>
```

```
<html>
```

```
<head>
```

```
<meta charset="UTF-8">
```

```
<title>HTML is easy to learn</title>
```

```
</head>
```

```
<body>
```

```
<h1>HTML is Easy To Learn</h1>
```

```
<p>
```

This is some text inside a paragraph. A paragraph creates a space above and beneath a block of text in a browser window. The HTML tags here are spaced so as to make them easy to see. This has no impact on the layout of the page in a browser window.

```
</p>
```

```
<p>
